

EMERALD CITY COMPUTER SOLUTIONS, INC.

USE THE WINDOWS CLASSIC VIEW

More comfortable performing a task with the familiar Windows Classic user interface? You can quickly switch the user interface to the familiar Windows Classic appearance on your computer if it helps you remember a task in your operating system or program. You can go back to the original Windows look with a couple clicks.

Right-click on your desktop, and then click **Properties**.

Click the **Appearance** tab.

On the **Windows and Buttons** menu, select **Windows Classic**. Click **OK**.

There you go, now you can feel right at home with the old look, and you'll still get the best out of Windows XP, new look or old.
